DETAILED ACTION

Claims 1-42 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to a method for fulfilling a request, classified in class **709**, subclass **230**.
- II. Claims 21-42, drawn to a method for facilitating a mid-session transition between a first client device and a second client device, classified in class **709**, subclass **227**.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as facilitating a mid-session transition between a first client device and a second client device. See MPEP § 806.05(d).

These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

- (a) The Group I search (claims 1-20) would require use of search Class **709**, subclass **230** (not require for the invention II).
- (b) The Group II search (claims 21-42) would require use of search Class **709**, subclasses **227** (not require for the invention I).
